Christ 4 Kenya

Executive Summary

Luke 3:11 until Matthew 6:33, Inc. is an American established church and faith-based organization (est. 2013) in Waco, TX, in the United States of America and is a partner of Matunda Mengi, a Kenyan organization created through the partnership of Ministry of Aservant (one of the organization's current aliases), YouthVest, a Kenyan organization focused on serving people on marginalized communities and creating spaces for them to learn, live and lead, and 3 localized churches in Kenya. LM633's primary goal in respects to this partnership is, ultimately, to create a better Kenyan society from the economical, educational, cultural, and spiritual perspectives through implementation of a community development project centered around addressing the needs of the many OVC's in the country and providing them with the right environments to remove social stigma and prepare them to be a part of the developing leadership of the future.

Matunda Mengi is thus inherently designed (from our perspective on the vision) to mate an impoverished area of Kenya to a more affluent area through pairing of community development centers which will include:

- OVC transitional care center
- A high-performance school
- An integrative church, and
- An community based, low-cost clinic.

The project focuses on rehabilitating the OVC population of youth in an environment rich in atmosphere of two-parent (mother and father) households. Through integrating OVCs and homed children in such a way, the social ideology of the community can be molded into one more accepting of ideas from people with a myriad of differing backgrounds, abilities and tribes. Instead of simply meeting an obvious need in the sea of problems in a third world country, our aim is to utilize the meeting of the need in a manner that also progressively generates solutions to larger and more numerous pools of need and population. Over time, this can lead to the general improvement of national well-being and wealth. Our mission is simple; strengthen our societies at the local, state, national then international levels by growing changed, upstanding, hardworking, Christian individuals ready to become the building blocks of a brave new world.

The total cost of initial implementation of this project is **\$156,800** with an optimal operational year 1 net return of around **\$15-20,000/annually**.

Need Statement

Please watch our documentary of the preliminary visit to Kenya and the documentary that was one of the fruits of the event. We truly believe no greater need statement could be spoken with words or graphs. If you are on a computer that is able to access the internet, please go here:

Poverty is not a condition; it is a mentality and lifestyle that is bred by one's life choices and ideologies that, together, create his or her world paradigm. What we may see manifest in the physical is a poor child with little food to eat and dirty hair, what caused it is the society's lack of knowledge of how to or care to plan, educate and elevate the disadvantaged AND the child's ideology that this manifestation is typical and acceptable. Without a belief that one should achieve more, one will not achieve at all (For as a man thinketh in his heart, so is he – Proverbs 23:7 KJV). If the Erase Poverty Plan does not get implemented, impoverished Americans would be at risk of continuing to fall into the downward spiral of crime, poverty, and drugs that is already manifesting. Just imagine the impact that could happen if even 40% of the impoverished became assets to the community they are hurting? Christ 4 Kenya through Matunda Mengi and the several Church unification partnerships we are facilitating needs to happen and it needs to happen now. For every two seconds we wait to begin another human loses their life some where in the world. Some of those could be stopped with sacrificial action from others. Let's not let our sacrifices keep us from saving some lives and, more importantly, saving souls.

Goals and Objectives

Goal

This project in its entirety is designed to increasingly strengthen Kenya's society and decrease orphan rates to a drastically reduced if not virtually non-existent levels by systematically integrating the ultra disadvantaged with the community they were marginalized from by creating a superior learning, spiritual, and health conscious environment for all individuals within that same community while simultaneously removing incorrect superstitions, tribal boundaries, and other social handicaps through education and social exercise.

Objectives

- Have full capacity enrollment of the orphanage spaces by the end of Year 0 (Construction Year)
- Have full capacity enrollment for school by the end of Year 0 for the next first trimester year (Year 1 maximum)
- Complete construction of 2nd city-village community center pair by the end of Year 5
- Have 3 operating city-village community center pairs operating by the end of Year 8
- Have 5 operating city-village community center pairs operating by the end of Year 10
- Have first high school equivalent graduating class of a completely in-house student body by the end of Year 12
- Maintain educational standards and test ranges that rank within the standards of the top ten educational systems in the world by year 3
- See an improvement of Kenya's overall global educational rank by the end of year 5 (currently #73 globally per 2017 data from US News, BAV group from Y&R, and Wharton University of Pennsylvania)
- See a reduction of OVC's by 5 percent in participating cities by the end of Year 10
